## From families for families: Experience and competence “Made in Germany”

As parents, we know only too well the needs of younger families.

We want to make their life a bit easier and safer.

For us, “Made in Germany” is not just an advertising slogan.

“Made in Germany” is a responsibility that we live by for our customers.

We are not an anonymous large corporation. Since 1932 and now in the 4th generation 150 employees are working today to produce products of the highest quality.

Carla & Christian Brunner, Hannes Vogl  
Owning family in the 4th generation

# 1932 – 2019

## A success story

### Start

1912

The company Hatu Gummiwerke Hartmann & Tuphorn GmbH is founded in Erfurt.

1945

The company receives a work permit from the Americans after the end of the war.

1932

The company Nürnberg Gummi E. Hartmann KG is founded.

Günter Hartmann / Company manager

NÜRNBERG GUMMI  
E. HARTMANN

1972

By purchasing the traditional brand nip® from the rubber thread factory in Cologne, Günter Hartmann lays the foundation for further business development.

1982

50  
The company celebrates its 50-year anniversary.

1980

Regina Vogel, born Hartmann, and her husband Knut take over management of the company.

### & development

As Germany's oldest manufacturer of soothers we have earned the trust of consumers over the past 85 years with our high quality standards.

Today young families in over 45 countries around the world profit from our decades of experience for a perfect start in life with nip® products.

1998

Production lines are modernized and the core competence in soothers is strengthened step by step.

2016

Brand relaunch 2016  
"From families for families"

Our basic idea, which conveys the three most important components of the family company – quality, family and tradition since the company was founded – becomes a central pillar of all of our communication.

2019

Launch of our new product line. nip® first moments offers solutions for the first moments together. For a carefree start. From the beginning.

2017

85  
SINCE 1932

Our quality has been confirmed not just by our customers, but also by independent bodies. nip® products regularly receive the Öko Test rating "very good".

Children are a wonderful gift. They enrich our lives but they also turn them upside down right from day one. Everyday life is reorganised and the needs of the child are always a priority. As a family business, we want to help and support parents in their new challenges and adventures with our experience and products. When developing our products we focus on optimal support for babies and toddlers, making everyday life easier for parents. Perfectly adapted to the specific needs of the various ages and stages of development from babies.

Giving our customers the best product quality for a fair price lies at the heart of what we do. The sign of our quality "Made in Germany" provides a high level of safety and quality, based on decades of experience and tradition in the market for baby products. Since 1932, we have been developing our products in close cooperation with scientists, doctors and midwives and in accordance with the latest medical and technical knowledge. In addition, they are tested regularly in own laboratory and checked by independent institutes.

## Our quality promise

- Improving quality of life by offering top-quality products
- More than 85 years of experience and competence 'Made in Germany' – and therefore extraordinary value and quality, high recognition internationally and compliance with strict standards and guidelines.
- Products are tested in our own laboratory and checked and certified by renowned institutes. TÜV-tested according to DIN EN ISO and IFS HPC
- Maximum safety and quality based on the latest findings from medicine and technology – all tested values exceed standard requirements
- Continuous improvement and further development by members of German and European committees
- Our quality management monitors and optimizes all processes that could impact on quality
- Active environmental management to protect our resources and environment
- Transfer of knowledge and impulses through long-lasting partnerships in over 45 countries

A close-up photograph of a woman with dark hair tied in a bun, looking down at a newborn baby she is holding. She is wearing a light-colored, ribbed cardigan. The baby is resting its head on her chest, and she is gently cradling it with her hands. The background is softly blurred, showing white pillows and a patterned blanket. The overall mood is intimate and loving.

*All love begins with motherhood.*

# *first moments*

*Inspired by mother love*

We know that the first moments are always filled with worries and doubts, so we would like to help you with our products and our expertise. Turning worries into trust and doubts into certainty. To do this, we have developed solutions which aren't just clever and simple – but one thing above all: absolutely natural.

*The all-round package for an easy start – first moments.*

A close-up photograph of a woman with dark hair tied back, smiling warmly at the camera. She is holding a baby in her arms. The baby is looking directly at the camera with large, light-colored eyes. The baby is wearing a white onesie with a grey pattern. The woman is holding a white baby bottle with a clear cap and a green floral design on it. The background is a soft, out-of-focus white. A large, light grey curved shape is on the right side of the image.

*Inspired by mother love.*

# first moments – for a gentle and relaxed start into a new life

## Perfection out of passion

We have developed a range of baby products for that exciting period full of love right after the birth, which will make it easier for young parents and will help with baby's start into life while promoting well-being and joy.

## Mother love based on experience

Already in its 4th generation, nip® has been here to help with understanding and experience for over 85 years. Our unique product range 'first moments' is aimed specifically at that magic time when you are together for the first time. For a carefree start. From the very beginning.

## Our All-in-One system: so easy and comfortable

EVERYTHING IS COMPATIBLE.

1. Pump

Pump mother's milk directly into the first moments breast milk container.

2. Store

Breast milk container is suitable for cooling and freezing. With practical label panel on the lid for the date and contents.

3. Prepare

Heat up without any problem. For best results, combine with the nip baby food warmer or a warm water bath.

4. Feed

By adding the screw ring and teat, you can turn the breast milk container into a bottle.

# Our best wide-neck bottle – for a natural drinking sensation

Dream team for a perfect start: our first moments wide-neck bottle with matching silicon teat. The round shape of the teat and the extra-wide lip rest copy mother's breast and create a natural drinking sensation. Made of particularly soft silicone, our teat stands for an incomparably gentle drinking experience. The proven anti-colic vent and the ACTIFLEX®-system both ensure a smooth, steady drinking flow.

## Benefits wide-neck teat

## The right teat from birth to all ages

**The smallest teat hole size for a slow flow of liquid.**  
Suitable for breast milk, pre-nutrition, tea and water.

**A medium teat hole size for a moderate flow of liquid.** Suitable for powdered milk formula.

**The largest teat hole size for a fast flow of liquid.**  
Suitable for thick liquid nutrition.

# The round, natural shape copies that of the mother's breast

A perfect match – the round, natural teat with its extra-wide lip rest and the first moments wide-neck bottle. The especially wide opening not only makes our wide-neck bottle easy to fill and clean, but also means that it can be stacked, thus saving valuable space.

## Wide-neck teat

- > extra-wide lip rest for more intimacy
- > round teat made from soft silicone
- > anti-colic vent prevents air from being swallowed
- > ACTIFLEX®-System for a steady flow of liquid
- > natural form, similar to a mother's breast
- > natural drinking sensation
- > available in three teat hole sizes

# Milk pump and breast milk container – everything fits together

Every woman has different preferences. That's why the first moments manual breast pump has two different pumping levels (2 Level Technology). The All-in-One system makes it easier to pump, store, prepare and feed mother's milk than ever before. Everything using just one bottle, without the need to transfer contents again and again.

Capacity 150mL

### Manual breast pump

- > extra soft silicone cushion
- > ergonomically shaped handle
- > safe for dishwasher and steam sterilizer
- > few parts, thus easy to clean
- > part of the All-in-One system
- > no intricate decanting
- > two individual pumping levels

### Our 2 Level Technology

- 1 **Level 1** for weaker pumping performance and stimulation
- 2 **Level 2** for stronger pumping performance

### Breast milk container

- > extra soft silicone cushion
- > ergonomically shaped handle
- > safe for dishwasher and steam sterilizer
- > few parts, thus easy to clean
- > part of the All-in-One system
- > no intricate decanting
- > two individual pumping levels

# Practical aid – so much more than just a nipple shield

Our nipple shields are especially thin to make the baby's drinking sensation as natural as possible and to maintain the close, intimate link during breastfeeding. The unique, slightly curved, triangular shape ensures as much skin contact as possible, while strengthening the feeling of comfort and closeness.

natural drinking sensation

super soft silicone

## Nipple shields

- › developed with the help of midwives
- › unique shape for maximum skin contact between baby and mother's breast
- › very good adhesion
- › extra thin for a natural drinking sensation

## To reliably help with

- › latching on difficulties or sensitive nipples
- › retracted or inverted nipples
- › babies with sucking problems

### 2-compartments box – ideal for on the move

Allows hygienic storage of a used nipple shield and keeps a second nipple shield clean for the next feed.

# SOOTHERS & Co.

nip® soothers have everything you are looking for in a soother. Not only do they satisfy baby's natural need to suck, they also support healthy jaw development right from the start. Three shapes for different needs: Whether breast-feeding-friendly, jaw-friendly or tooth-friendly – nip® offers the right soother for every baby.

ventilation  
holes

0%  
BPA

# The big soother check – find the right soother for every need

Sucking calms baby – that's undisputed. Soothers make baby feel safe, comfort and console, and train baby's mouth and jaw muscles. But what is the best shape? Round, soft, dental, or jaw-friendly, latex or silicone? Babies' (and mothers') needs are very different, which is why we have three different shapes of nip® soother to offer every baby just the right one for his little mouth.

Well thought-out: the nip® size concept!

## Breastfeeding-friendly soother

The soother for the most natural sucking feeling. The teat shape replicates the shape of the nipple giving your baby a very similar feeling to breastfeeding. Problem-free switching between breast and teat. The round, soft shape prevents your baby from becoming confused during breastfeeding.

# Miss Denti® – tooth-friendly: small wings with a big effect

In the developmental phase, baby's teeth and jaw are highly sensitive and there is a risk that they might become misaligned. When sucking ordinary suckers, the child continuously bites on the soother shaft, which exerts pressure on the small incisors. This can impair natural jaw and dental development and result in misalignment.

*Kai*

The first dental soother that offers genuine protection

"Generally, every soother is a foreign body in your child's mouth. Which is why the period for which a soother is used should be reduced as much as possible. But soothers are better than thumb in all cases."

DEVELOPED TOGETHER  
WITH THE ORTHODONTIST  
DR. KAI HAGEMANN

## How it works in detail

- + Miss Denti® is a special soother with wings and is wider than conventional soothers. The innovative Miss Denti® design has been developed to provide improved protection for children against tooth and jaw misalignment.
- + Conventional soothers feature a narrow shaft that sits between the sensitive milk incisors and exerts pressure on them during sucking.
- + Miss Denti's® wide shape relocates or distributes biting pressure in the mouth and thus takes the strain off the sensitive milk incisors and jaw areas.

Miss Denti® grows too – Perfect adapted to natural dental growth

### 1 - 2 - 3 The size concept

#### Size 1 – For children without teeth (0-6m)

Miss Denti's wide shape distributes biting pressure evenly across a larger area. Baby's jaw does not suffer pressure on individual areas, which protects it from misalignment.

#### Size 2 – For children with first teeth (5-13m)

Miss Denti's special wings give it a wider shape. This wider shape distributes biting pressure across several small teeth. The stabilisation waves offer additional bite-resistance and safety for toddlers' small teeth.

#### Size 3 – For children with first molars (13m+)

Miss Denti's wings lie flat on the molars and thus relocate biting pressure from the incisors onto the molars, which can take more pressure. This takes pressure off the sensitive incisors. The stabilisation waves offer additional bite-resistance and safety for toddlers' small teeth.

improved chin protection

### Miss Denti®

- for healthier dental development
- prevents tooth and jaw misalignment
- takes pressure off the sensitive little teeth and jaw by distributing the pressure
- anatomic, jaw-friendly, silicone teat
- rounded shield protects against skin irritation
- large ventilation holes enable baby's skin to breathe optimally
- extra stabilisation for soother sizes 2 and 3
- available in sizes 1-3

# MOUTH AND TEETH CLEANING

In the first few years of baby's life, the foundations for healthy teeth and sound gums are laid. The right kind of care for babies' mouths therefore begins even before the first teeth appear. This not only ensures that baby is perfectly prepared for when the first teeth come through, but baby also gets used to daily oral and dental care. When the first teeth start to break through at around six months, it can often cause baby pain and unpleasant itching. Chewing on teething rings can work wonders and offer help.

gentle massage

non-slip handle

# Tongue, gum and tooth cleaning

In addition to its skin, baby's mouth is its most important sensory organ. Licking, sucking, chewing. That's how baby learns to differentiate and gets to know its environment. We develop our products together with experts using the latest findings from medicine and technology while complying with strict standards.

tested safety!

37086	nip® tooth care starter set	1	10

TESTED BY MIDWIVES AND HAS RECEIVED "GOOD" RATING.

nip® mouth cleaning finger mitt received positive rating for use, quality, size and cleaning performance. Mothers trust the expert opinions of many midwives and recommended products for baby.

Our leaflet

# BABY WELLNESS

Washing, cutting, care – babies don't need much for their daily care. Water and a couple of important utensils are usually enough. With the right care and tender affection, parents will not only make their baby feel clean, they will also be giving her closeness and comfort. And if baby is not feeling very well – if her nose is running or she has a poor tummy – nasal aspirators and heat pads can help.

pleasant  
lavender scent

soothes  
stomach aches

# First daily care for baby

We are very sensitive when choosing our care series. We pay special attention to safe, soft, round, warm, fluffy and useful products. So that not just baby feels good, but the whole family.

Our leaflet

## Nasal decongester

- for gentle removal of nasal mucus
- tip is made of pleasantly soft PP
- large tip form prevents from getting too deep into the nose
- ease of handling
- easy to clean

# Non-slip bath equipment for babies and children

Bath equipment should be stable, non-slip, ergonomic, but also slight and thus suitable for trips. Non-slip nubs offer stability. The cute design motivates children to move from the potty to using the toilet.

## Bath stool

- stable due to non-slip nubs on the top and bottom
- soft shape with rounded edges
- modern, timeless design in grey-white and cute animal picture
- supports up to 50 kg

ITEM NO.	Item description	pcs per pack	packs per sales unit
37083	nip® stool	1	–

## Potty

- the perfect way to start life without nappies
- potty with comfortable seat height
- takes up very little space
- stable, light, easy to empty and clean
- soft shape with rounded edges
- non-slip base ensures stability
- modern, timeless design in grey-white and cute animal picture
- usable at home and for travel

Soft trainer

## Plastic or glass?

Plastic bottles (PP) are light, stable, do not break easily, and are easy to hold, even for toddlers. Glass is traditional, heavier than plastic, heat-resistant and won't suffer scratches.

Both glass and plastic bottles are suitable for feeding. Once the child becomes more active, and drinks on its own, robust plastic bottles are more suitable.

# Wide-neck bottles – for happy tummies

Wide-neck bottles made from glass or plastic with the specially developed ACTIFLEX® system and anti-colic vent. The soft wide-neck teat suits the child's palate perfectly and is tailored to baby's natural sucking behaviour. The wide lip rest creates a natural drinking sensation by mimicking the mother's breast.

FROM  
BIRTH

### Wide-neck bottle made of glass

- anatomically, orthodontic wide-neck teat made of silicone
- enables even drinking without the need to frequently break off
- ACTIFLEX®-system prevents the teat from closing up
- anti-colic vent prevents air from being swallowed, thus reducing the risk of infant colics
- universal size 0m+ with wide lip rest for a natural drinking feeling
- bottle fitted with M teat
- bottle is made of especially heat-resistant glass, non-porous and smooth
- curved shape makes the bottle easy to hold
- easy2clean – easy to fill and clean
- screw ring with practical helper for opening and closing
- 120 and 240 ml
- 4 designs

Anti-colic

ITEM NO.	Item description	pcs	
		per pack	packs per sales unit
35065	nip® glass wide-neck bottle, 120 ml, Boy, silicone, size 0+, M	1	6
35066	nip® glass wide-neck bottle, 120 ml, Girl, silicone, size 0+, M	1	6
35063	nip® glass wide-neck bottle, 240 ml, Boy, silicone, size 0+, M	1	6
35064	nip® glass wide-neck bottle, 240 ml, Girl, silicone, size 0+, M	1	6

ACTIFLEX® system prevents the teat from closing up, thus ensuring an even flow.

Anti-colic vent prevents air from being swallowed, thus reducing the risk of infant colics.

### Wide-neck bottles made of Polypropylene (PP)

- anatomically, orthodontic wide-neck teat made of silicone
- enables even drinking without the need to frequently break off
- ACTIFLEX®-system prevents the teat from closing up
- anti-colic vent prevents air from being swallowed, thus reducing the risk of infant colics
- universal size 0m+ with wide lip rest for a natural drinking feeling
- bottle fitted with M teat
- curved shape makes the bottle easy to hold

## Easy transition from feeding to drinking on their own

### Phase 1 Bottle feeding

From birth, the nip® drinking system has the right bottle tailored to baby's development.

### Phase 2 Simply change from bottle to beaker

nip® training bottles and beakers help your child to learn the drinking process: take up, tilt and break off.

# Training bottles and beakers – easy transition

nip® training bottles and beakers offer a child-friendly transition to drinking on their own but helping children practise the actual drinking process: take up, tilt, and break off. Toddlers can securely grip and hold the ergonomic non-slip handles. All spouts are orthodontic, and use an ACTIFLEX® system and an anti-colic vent.

6 MONTHS

# Cool Twister® – a safe and fast way to get baby's bottle ready

Due to the germs and bacteria contained in the drinking water, the water for the baby bottle must first be boiled fresh before it is cooled down to the recommended drinking temperature for the bottle preparation. The Cool Twister® cools the boiling water to exactly the right temperature in 80 seconds by heat exchange and preserves all temperature-sensitive, probiotic nutrients in the baby food. Especially safe and healthy.

Our leaflet

**Safety:** cools down boiling water to the exact temperature required for preparing the bottle

**Health:** preservation of temperature-sensitive, probiotic nutrients in baby food

**Quickness:** baby bottle ready to drink in 80 seconds

**Top-ratings:** from families and midwives

germ-free and works without electricity

## Cool Twister®

- easy to use and does not need power – ideal when you're on the go
- runs on cold water alone
- light and a handy size
- easy to clean, e.g. in the steriliser
- fits on the most baby bottles

The temperatures of 40, 50, 60 and 70°C recommended by the manufacturers of follow-on formula can be achieved easily and exactly by filling the Cool Twister® with different volumes of cold water. You can simply read the volume details off the Cool Twister®. The clever construction inside the Cool Twister® prevents the cooling water from mixing with the boiled drinking water.

ITEM NO.	Item description	pcs per pack	packs per sales unit
37090	nip® Cool Twister®	1	4

**AWARD-WINNING.** We are especially proud of the awards and recommendations that we have received from experts.

**WE WHOLE-HEARTEDLY RECOMMEND THE COOL TWISTER®!**

## The world's first water cooler for baby's bottle

It's as easy as that:

fast and safe

1.

Boil fresh tap water and fill the beaker to the brim.  
**The heat-insulating silicone ring** prevents the beaker from heating up too much and allows the boiling water to be poured in safely.

2.

Turn the Cool Twister® by 180°, put it on the threaded neck of the cup and screw them together.

3.

Turn the screwed unit upside down again and put it directly over the neck of baby's bottle. Hot water automatically runs through the Cool Twister's® cooling coil and is cooled down.

# Steriliser – Use it to sterilise, heat up bottles, steam food

A safe way to disinfect baby's bottles and accessories – no more germs!

The nip® steriliser is easy to use, fast and safe, thanks to its automatic switch-off system. Get rid of germs on your nipple shields, soothers and toddler crockery easily with the nip® steriliser.

→ 99.99 %  
germ reduction  
on bottles and  
accessories

## Steriliser

- sterilizes up to 6 bottles and accessories with steam in 9 minutes
- optical signal function
- switches off automatically once sterilisation is complete, preventing overheating
- bottle container and accessories basket can be used separately
- easy2clean - All parts (except for the heating element) are dishwasher-safe
- modern, discreet design to match every kitchen
- additional steaming function to prepare food
- glass heating function

0%  
BPA

# TABLE TRAINING RANGE

As children grow, they face ever new challenges. Small children think it is a great adventure to eat and drink on their own. Little aids such as non-slip plates and soft spoons simplify the transition towards eating and drinking on their own. Step by step – nip® supports a healthy, natural development from feeding to drinking on their own.

← easy to hold

# Easy transition for toddlers – from feeding to eating on their own

Step by step – nip® supports a healthy, natural development from feeding the first purée to drinking from the beaker on their own. All our table training range products are especially light, have rounded edges and can be stacked so they take up less space. Children love their bright colours and cute giraffe motif.

37078	nip® feeding spoon short, pack of 5	5	10
37079	nip® feeding spoon long, pack of 3	3	10

## #MustHave for on the go

Our snackboxes are a hit with young and old alike. Bright colours and especially handy! The boxes are a safe way to store snacks, vegetables and fruit and are great for use on the road. Especially desirable: the new SnackBox 2in1. The silicon insert allows children to take out their snack without dropping the rest. Afterwards, the box can be used as a cup.

with lid for a  
hygienic transport

Learning to grasp by  
the soft silicone insert

### Snackbox

- convenient storage box with lid
- great for when you're on the go
- small shape is light, stackable and saves space
- can be used to freeze purée portions
- cute giraffe design in bright colours
- dishwasher, microwave and freezer safe
- made from sturdy polypropylene (PP) plastics

**NEW!**

**9+**  
MONTHS

for snacks and  
finger food

**2IN1**  
SnackBox and  
drinking cup  
in one!

ideal as a  
drinking cup

### SnackBox 2in1

- for the practical storage of small snacks and finger food
- the silicone insert makes it easy to reach into the box and keeps the contents safe
- with lid for a hygienic transport without crumbs
- supports the independent intake of food
- **added value:** Can later be used ideally as a drinking cup
- with anti-slip handle and non-slip base
- suitable for dishwasher and microwave
- 250 mL – perfect volume for children

# Our baby packs – great first sets

nip® offers a great starter set for every life phase containing a selection of useful products. Our initial starter set is the best way to get to know nip® soothers, bottles and rings. The bottles, accessories and water cooler set gives you everything you need to bottle-feed your child, together with the Cool Twister®. We help with the switch to follow-on formula with a 13-part set containing clever do-it-yourself products.

## Table training starter set
